### What is Shea Butter ?

There is a tree in Africa known as the Karite or Shea Tree. From the fruit of this tree a small nut is extracted, then dried, pounded and smoothed between stones to produce a paste known as Shea Butter.

This paste moisturizes, revitalizes and protects the skin. Its high content of vitamins A,E & F leave a beautiful satin finish and improves elasticity. Used as a protective film against cold weather, it eliminates chapped lips and ashiness you may experience during winter months. It may also be used along with sunscreen products before and after sun exposure to eliminate peeling due to prolonged exposure.

It is excellent for diaper rash and for lubricating dry, flaky patches of eczema.

Shea Butter is also the best kept secret to prevent stretch marks.
